

User Manual

Low Voltage 360 LED Net Lights:

Dimensions:

Instructions for use:

1. Connect to power supply first to ensure that the lights work before installing.
2. If lights do not turn on after the power is connected:
 - ① Press the ON button on the remote control.
 - ② If the lights still don't go on, press and hold the button on the white controller(US) for a few seconds.
3. If there is still a problem , please contact our customer service with your Order Number. We'll be happy to help.

Specifications:

Material: Copper + Plastic

Dimension: 4m*2m(13.1ft*6.6ft)

Power lead copper length: 3m(9.8ft)

Waterproof grade: IP44

Maximum remote control distance: 5m(16.4ft)

Rated voltage: 29V(US)

Mode: 8 Lighting Modes

Features

1. Standard Timing program gives you a set-and-forget function.
2. Operating with 29V DC output voltage, it has excellent heat dissipation and it's safe to touch.
3. 8 Lighting Modes to choose from.
4. Strands may be connected together (no more than 3 sets) and can be controlled by one controller or remote after connected.

Operation:

1. Hang up or spread out the net light and link two lights together if you need.

Guide to connect two string lights end to end:

- ① Find the end of one mesh light and remove the lid;
- ② Remove the plug from another net light (and the controller if a controller is connected)
- ③ Connect 2 ends together and then cover with the round ring.

2.Connect the power supply.

3.Select the mode with controller(US) or remote.

4. Set the timer(Optional).

Press the timer setting button, an indicator light on controller will light up and the net lights start timing program.

Application:

Perfect Decoration for Christmas tree, party, wedding, home, window, shows, hotel, commercial building, shopping center etc.
