

CASIA 2

CASIA 2 is a power strip for corners and niches in a slim, design-focused shape. It is available in two versions.

The first version features a length-adjustable telescopic element and is suitable for installation in different kitchen types, both with and without wall units. A sliding device ensures that the socket housings are not visible.

The second version is small and compact: perfect for kitchens with limited space or those without wall units. Both versions can either be installed horizontally or vertically.

The high-quality surface is available in a stainless-steel look or as a black anodised version. Anti-fingerprint characteristics minimise marks.

As a kitchen socket, CASIA 2 either has a socket housing or a socket housing with a powerful 22 watt USB A/C charger. Different voltage profiles ensure device-friendly charging.

BENEFITS

- **Hidden sockets**
- **Optional 22 watt USB A/C charger**
- **Slender, delicate appearance**
- **Adjustable using the telescopic element**
- **High quality metal surface**
