TOOL HEAD INSTALLATION AND MAINTENANCE

1.Heads Assembly and Disassembly

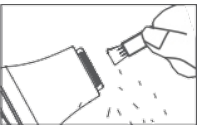

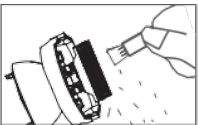

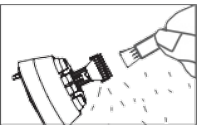

* Assembly of cutter head

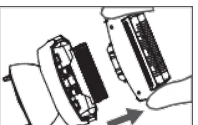

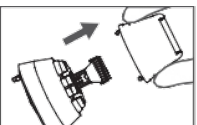

Aim the cutter connector A to the machine slot B, Press the cutter back heavily until hearing a click.

* Disassembly of cutter head

Pull the cutter head away from the body B in the opposite direction.

2.Cleaning and Maintenance of Cutter Head

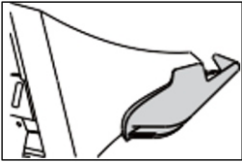

- Gently pull up the blade cover (for full size & mini shaving head) ;
- Use the cleaning brush to brush off the hair which stick to the cutter head or rinse with water (for all heads) .

3.Lubrication of Cutter Head

Lubricating oil is not included in the package, you can use other lubricating oil of the same type instead. You can add a small amount of lubricating oil between the blades every few teeth. If you clean it properly, the machine doesn't need to be lubricated as frequently.

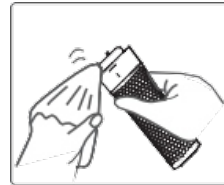

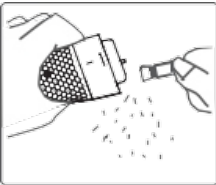

4.Guid e Comb (Precision Trimming Head Only)

Using a guide comb can trim the corresponding length of hair; can avoid the thin hair caused by operation error, and effectively control the overall thickness of hair style.

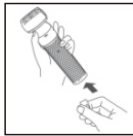

* Comb application: aim the slot on one side first and then the other until you hear a "click".
* Comb removal: this is opposite to comb application by removing one side from the slot then the other side.

BODY CLEANING AND MAINTENANCE

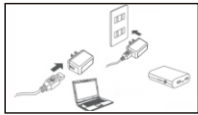

Note: Turn off this product before cleaning and maintenance.
