

# Connectivity and Setup

## Video, Audio, and Touch Interfaces

If your PC does not have a USB C Thunderbolt 3 or 4-rated port to use with the included USB C cable, you may alternatively connect video, audio, and touch interfaces with a Display Port or HDMI cable **and** a USB Type B to Type A cable. Please note, the USB B to A cable is a requirement for the camera, mics, and speakers to function when HDMI/DP is used for video/audio.

***\*\*Display Port, HDMI, and USB Type B to Type A cables are not included with the Pana34\*\****

## MacBook Users

For MacBook users, we offer Mac OS touch drivers, free of charge, available directly from: <https://www.jupiter.com/support/>

## Refresh Rate

The maximum video refresh rate of 165 Hz is only available when using the USB C (preferred) and DP inputs. Using only the HDMI input on the Pana will limit the max refresh rate to 100 Hz.

## Stylus Pen

The stylus pen is included with a USB A to USB C charging cable. The pen will automatically charge and pair once the cable is plugged into the Pana USB A port.
