

Wheel Hitch™ Front Wheel Holder

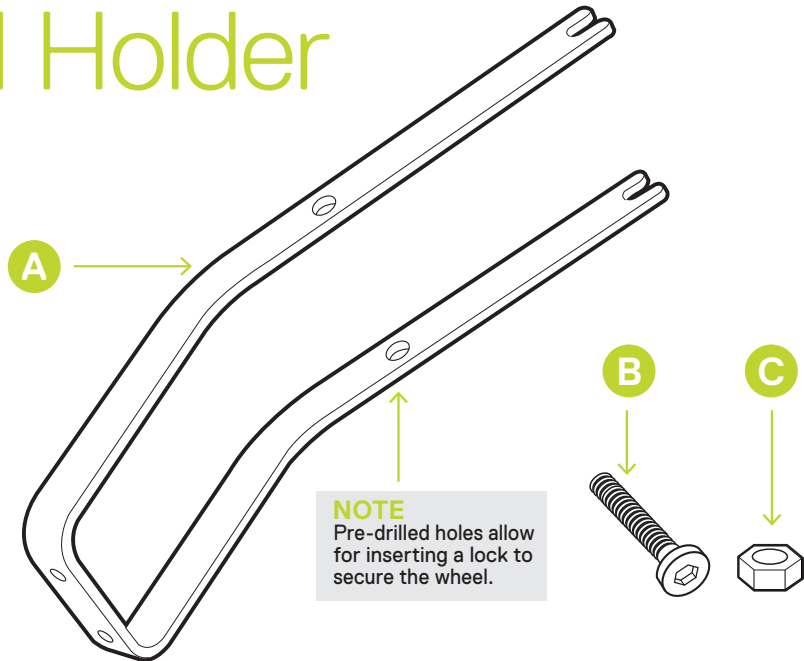

Assembly instructions BH4000

Parts

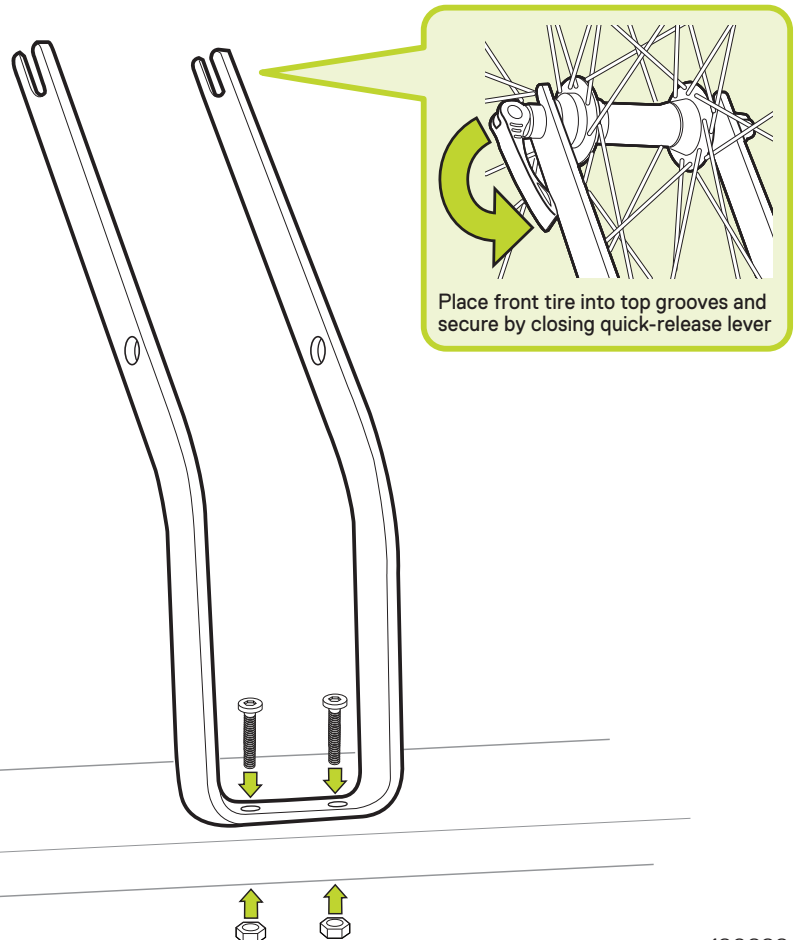

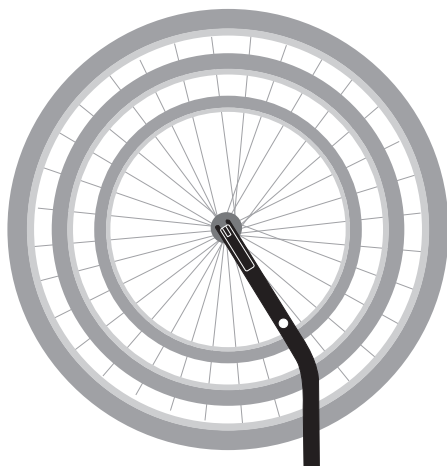

- A** x1 — Wheel Hitch
- B** x2 — Bolts
- C** x2 — Nuts

Tool Required

Allen Key (Included)

- 1 Place Wheel Hitch in desired location of flat surface and mark one hole for drilling.
- 2 Drill hole using 1/4" bit.
- IMPORTANT SAFETY NOTE**
Wear eye protection when using power tools.
- 3 Insert 1/4" (6mm) diameter bolt through hole and tighten securely. (Using included nut)
- 4 Drill second hole using Wheel Hitch base as a guide.
- 5 Insert second bolt and tighten nut securely.

Works with 20-29 inch wheels
Fits bike with a 100 mm x 9 mm dropout

WARNING

The Wheel Hitch is designed to hold a front wheel only and has not been designed to support a rider and should never be used with a person on the bike.
