

astro

Meet Amazon Astro

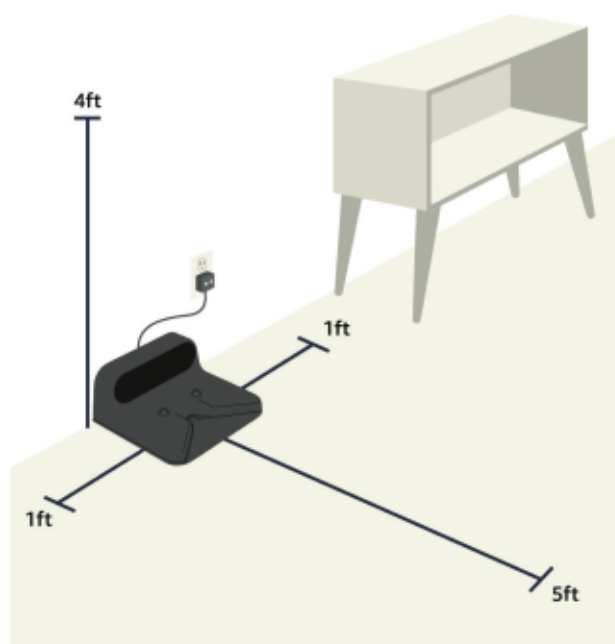

Find a home for the charger

STEP 1

Place the charger on a flat surface against a wall and near a power outlet. Make sure the area surrounding the charger is clear of small items and furniture.

STEP 2

Plug one end of the power cable into the back of the charger, then the other end into the outlet.

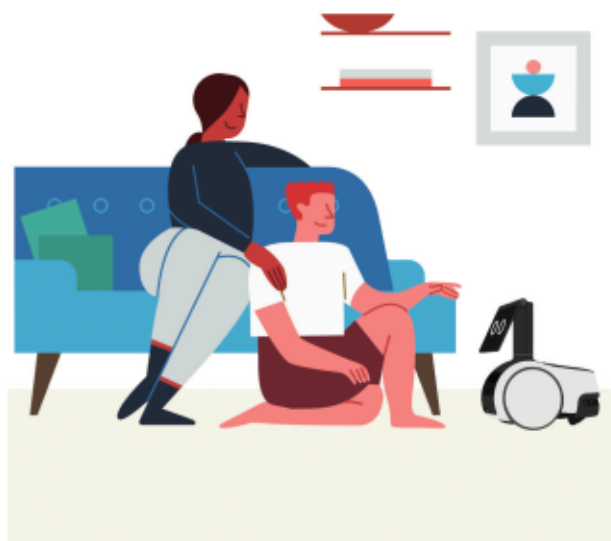

STEP 3

Place Astro in front of the charger, facing away from the wall. Use the white areas of Astro to gently roll it backwards onto the charger until it settles onto the charging contacts. The Amazon Smile logo will appear on-screen as Astro powers up. In case it does not power on, make sure Astro is on the charging contacts before pressing and holding the mics/cameras (ø) button.

Get Astro ready to roll

STEP 1

Make sure you have the login info ready for your wifi network and Amazon account.

STEP 2

Follow the on-screen instructions. You'll start by introducing Astro to yourself and the people who spend the most time in your home. Then, you'll pair Astro with the app and spend about 45 minutes helping it learn about your home.

TIP

If you need to pause setup, make sure to roll Astro back onto the charger before you leave.

PAIRING ASTRO WITH THE APP AFTER SETUP

If you didn't pair Astro with your mobile device during setup, you can do so at any time. Download the Astro app from the app store on your mobile device and log in with your Amazon account. Then, simply follow the on-screen instructions.

TOP THINGS TO TRY

Astro doesn't begin sending audio to the cloud until it detects the wake word. Try some of the requests below to see Astro in action.

"Astro, follow me."

"Astro, go to the charger."

"Astro, stop moving."

"Astro, turn around."

"Astro, take this to the kitchen."

"Astro, dance."

"Astro, what's the weather?"

"Astro, play music."

"Astro, remind me to walk the dog at noon."

"Astro, I love you."

For more Things to Try, please see the additional card included in the box.

Learn how Astro protects your privacy

Amazon designs devices with multiple layers of privacy protection. Here are some ways to control your privacy on Astro.

TURN OFF MICS, CAMERAS, AND MOTION

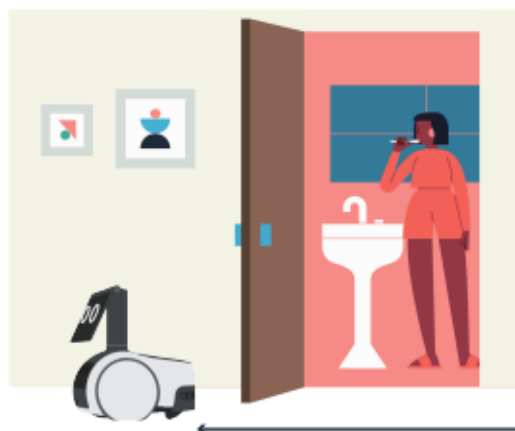

When you press the microphones/cameras off button, the microphones, bezel and periscope cameras, and navigation and depth sensors are turned off. Astro can't move or capture audio or video until you press the button again.

DELETE VOICE RECORDINGS

You can delete voice recordings, manage the map of your home, and customize your home monitoring preferences in the Astro app. To learn more, go to Settings.

TROUBLESHOOTING

For troubleshooting and more information, go to Help & Feedback in the Astro app.

CREATE OUT OF BOUNDS ZONES

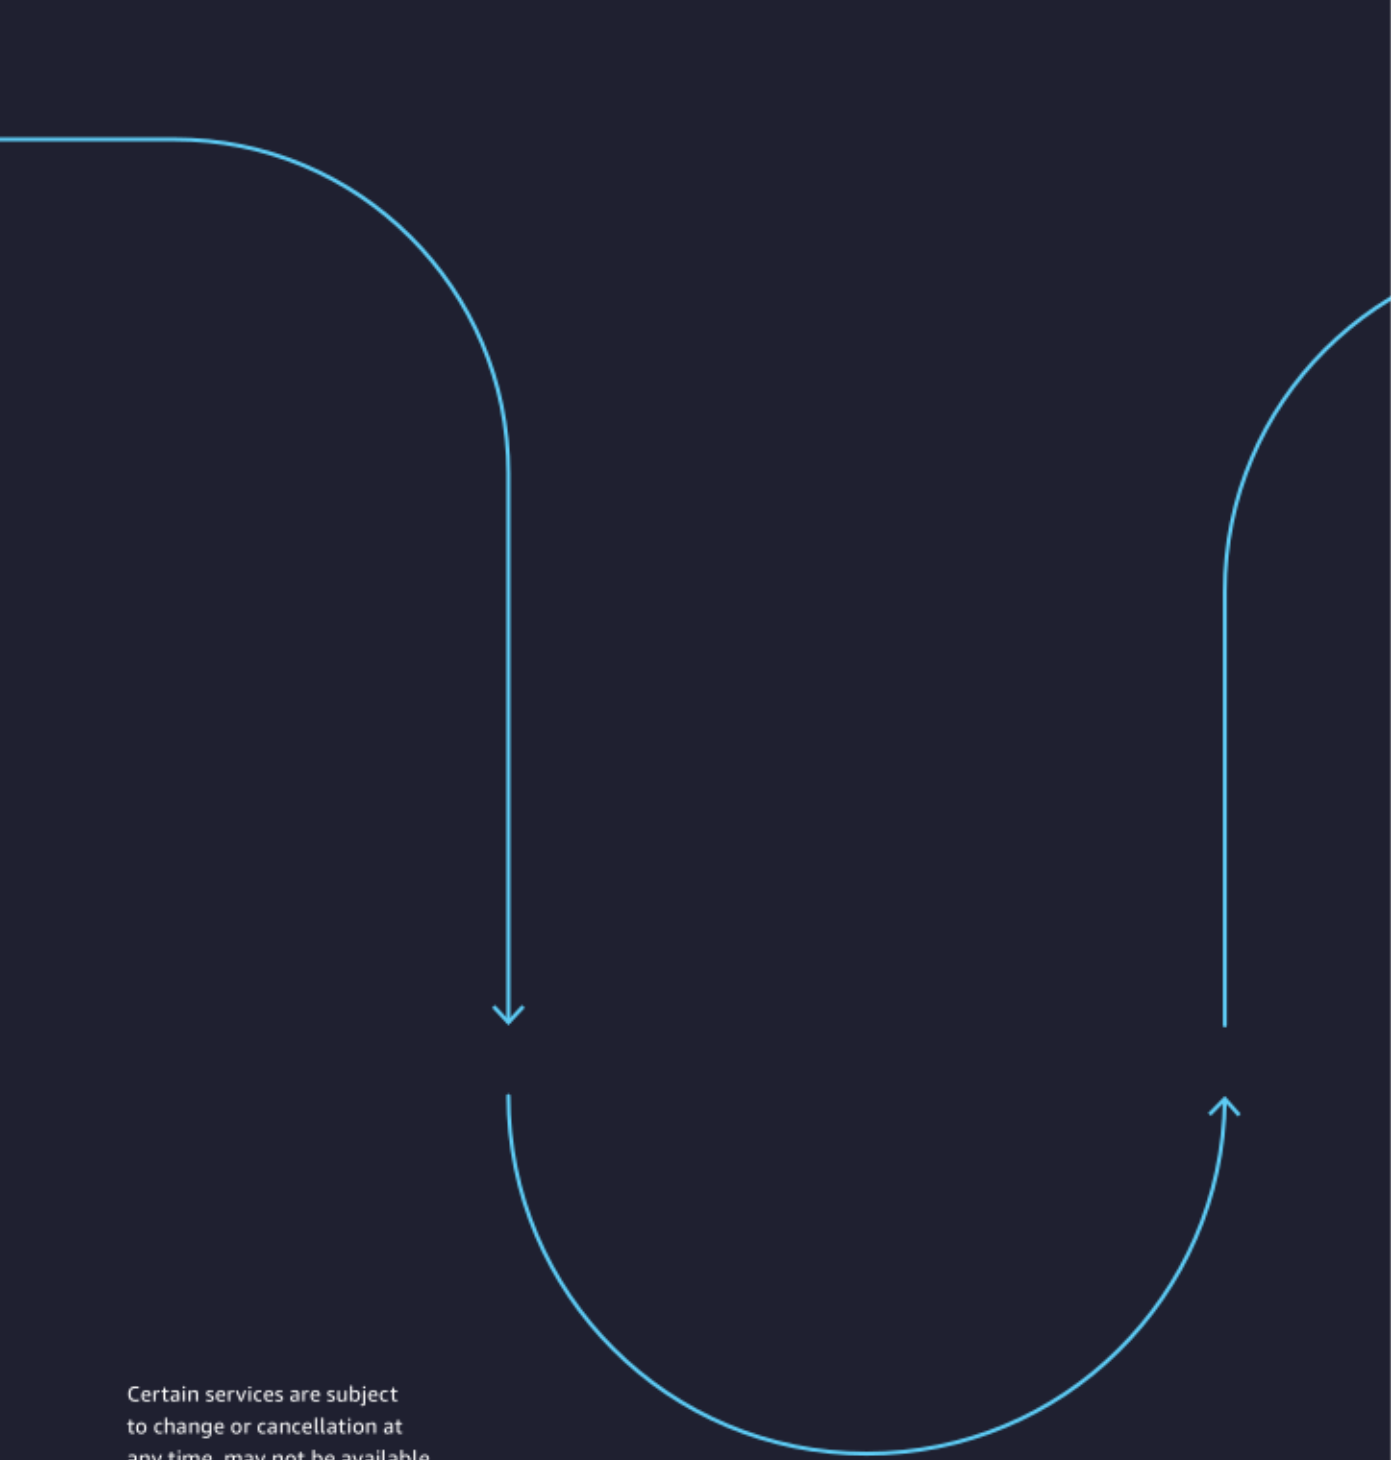

You can create out of bounds zones on the map in the Astro app to let Astro know where it's not allowed to go.
