

YOU OWN A CRADIAC

ASSEMBLY INSTRUCTIONS - AMAZON

STEP 1: UNPACKING YOUR BIKE

When your bike arrives, it will be 95 % fully assembled. Your brand new bike is ready to ride in a few simple steps. Begin by carefully cutting the packing cover.

STEP 2: ATTACH THE HANDLEBAR

After removing the packing cover attach the handlebar. With the help of an allen key (check the toolkit in the box) remove the nuts of the stem and place the handle bar.

STEP 3: ATTACH PEDALS

Check the pedals to determine which is which. You can see the L and R markers respectively. You should use the L pedal on the left side of the bike, and the R pedal on the right side (which would be your left and right when seated on the bike). At first, attach each pedal by screwing it onto its corresponding threads with your hands (turning clockwise for the right pedal and anti-clockwise for the left). After that, use a wrench to tighten them firmly.

STEP 4: ADJUST THE SEAT HEIGHT

To adjust the seat height, pull the quick release lever attached to the top of the seat tube outwards. Now loosen it by turning it anti-clockwise and adjust the seat to your desired height. Finally tighten it by rotating clockwise.

BEFORE YOUR FIRST RIDE

In order to ensure your bike is safe to ride, we strongly recommend you take your bike to a professional bike shop for a complete inspection and fine-tuning.

A BASIC GEAR TUNE-UP IS REQUIRED FOR GEARED BIKES FOR SMOOTH GEAR SHIFT. PLEASE VISIT YOUR NEAREST BICYCLE SHOP
