CRI	85	Size	45 x 45 x 148 mm

This is a WEEE symbol. It indicates that when the end-user discards this product, it must be sent to separate collection facilities for recovery and recycling. By separating this product from other household-type waste, the volume of waste sent to incinerators or land-fills will be reduced and natural resources will thus be conserved. Lifemax Ltd provide an end-of-life solution for this product when sold in the UK by accepting back any end of life items for processing by a local registered waste disposal company.

Foldaway Portable Light

SKU: 2204

Instruction Manual

Thank you for purchasing a Lifemax Foldaway Portable Light. We hope you'll get many years of use from this product. We recommend you read this document thoroughly to familiarise yourself with how your product works, how you should use it safely and effectively and how to look after your product to ensure it continues working as it should.

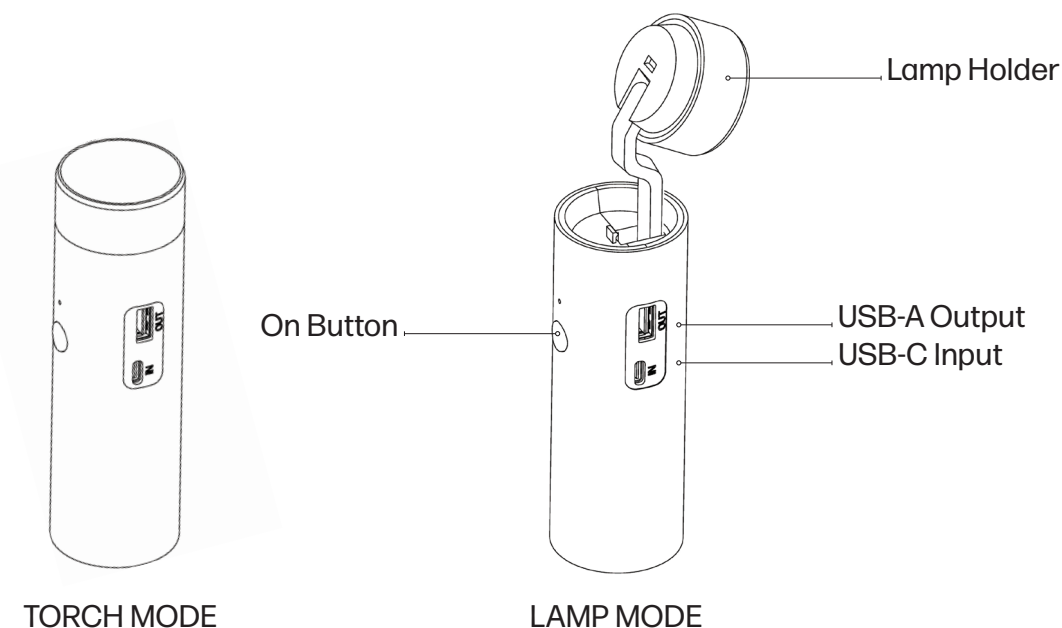

Product Information

Be sure of good quality, bright light wherever you go with this compact torch with clever fold out design. Boasting 100 lumens of light and a colour rendering index of 85, this portable solution is ideal for anyone with low vision.

Whats included...?

Foldaway Portable Light, USB-C charging cable, Instruction Manual

How to use...

Before first use, your Foldaway Portable Light should be fully charged. Plug one end of the USB-C cable into the light and the other end into a suitable power source, such as a USB power adapter (sold separately).

Once the light is plugged into a suitable power source, a red LED light will start to flash. When the light is fully charged the red LED will change from flashing to a solid red light. A blue LED light will flash to indicate that your light requires charging. If, whilst using your light, it dims on its own this also indicates that the light requires charging.

To turn on your Light, press the On Button next to the LED indicator light. The light will turn blue to show the lamp is powered on. The light is on with the lowest setting. Press the On Button again to increase the brightness to the medium level and again to increase the brightness to the highest level.

To convert your light from torch mode to lamp mode, gently pull the lamp holder away from the body of the light and flip the lamp holder over. The light can then be placed on a desk or flat surface and used as a lamp. To convert the light back to torch mode, simply reverse this process.

The light can also be used to charge your mobile device. Simply plug your mobile device, using your existing device charging cable, into the USB-A port on the light. Your mobile device should immediately start to charge.

How to look after...

Do not use or store your light in direct sunlight. The light should be stored in at temperature no lower than 10°C and no higher than 50°C with relative humidity less than 55%. Do not get your light wet or submerge it in water. Do not drop your light, it may stop working. Do not attempt to disassemble or service your light, doing so will void its warranty. Keep away from children. Only use correctly rated power sources to charge the light. If the light becomes hot or appears to be malfunctioning, cease using the product immediately.
