100% Waterproof

LED Bathtub Light

COLORIZE YOUR BATH WATER

USER GUIDE

Thank you for purchasing the Atom LED Bathtub Light!

You can now control the color of the water and create a light show while you relax in the bathtub!

This light is made of high-quality waterproof materials and has an attached suction cup to keep the light connected to the side of the bathtub. It also includes a remote to allow you to control the color of the light's output.

Tip: The LED light is sealed by a silicone gasket. Please tighten the cap before putting it underwater.

Remote Details

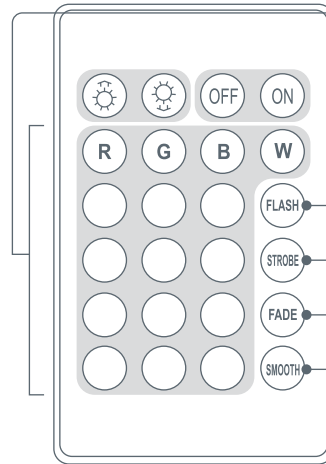

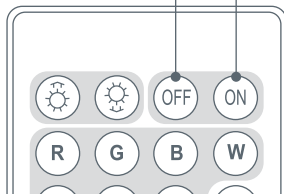

1. Remote must be pointed directly at device.
2. Remote working radius in water is 1-3 meters or up to 10ft.
3. Remote working radius out of water is 8-meters or up to 20 to 30 feet.

Remote Instructions

First, you will need to make sure you remove the plastic tab from the battery of the remote. Once the tab is removed, the remote will then work.

On Button - turns it on

Off Button - turns it off

The Colored Buttons - will turn the light that color

Flash Button - will change multiple colors and then the top-left buttons (☀️ and ☀️) that are white will control the speed of the flashing colors

Strobe Button - will strobe the color white and then the top-left buttons will control the brightness of the strobe light.

Fade Button - fades multiple colors and the top-left buttons will control the brightness of the fading light.

Smooth Button - flashes through green, blue, and red. The top-left buttons will also control the brightness of these colors.
