

To be used in conjunction with the Striplox Clip 50 installation guide.

1

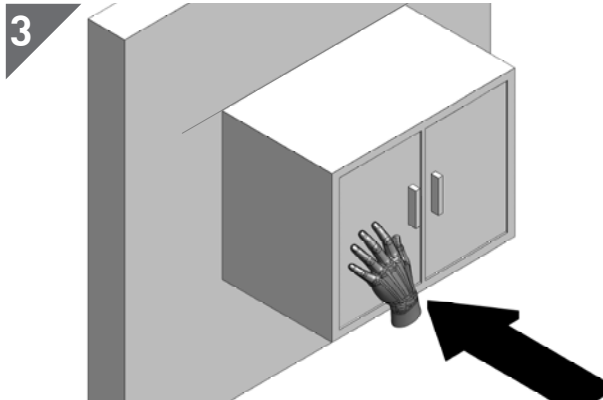

Attach male Striplox Clip 50 onto the object following Striplox Clip 50 installation guide and use the female Striplox Clip 50 part on the wall.

2

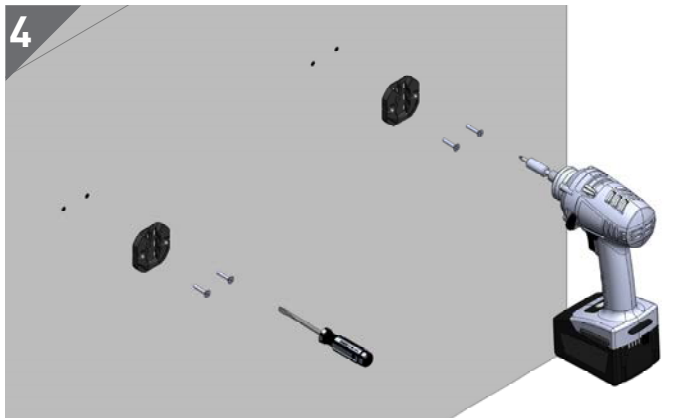

Attach the Striplox Clip 50 Jig onto the Striplox Clip 50 part by sliding into its fully locked position.

3

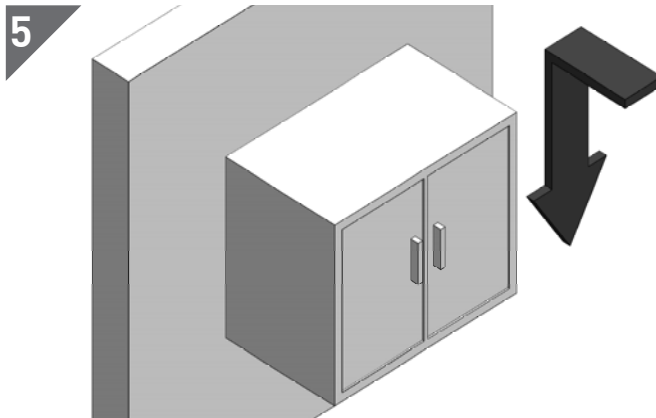

Position object and push against the wall firmly. The jig will indent the corner screw positions for the opposing Striplox Clip 50 part.

4

Fix the Striplox Clip 50 part into position using the indented markings using sufficient screws for satisfactory embedment. (note: dry wall mountings may need to be used)

5

Place the object onto the wall push and slide into position ensuring the parts have interlocked.
