ELECTRIC MIXING CUP

The magnetization cup has a stirring function

The magnetization cup has automatic stirring function, switched on to power the motor, and the magnetic device built into the bottom of the cup drives the magnetic rod to stir the drink in the cup at high speed.

The benefits of drinking magnetized water

1. Drinking magnetized water in a long-term can help nutrient absorption, improve gastrointestinal function, promote metabolism, improve immunity.
2. Drinking magnetized water in a long-term will lower blood pressure, reverse atherosclerosis, thrombosis, obesity, urethritis, gastritis and constipation and other symptoms.
3. Using magnetized water as mouthwash in a long-term will effectively remove dental stones, prevent gingivitis, make teeth white and strong.
4. Using magnetized water for bath in a long-term will help to avoid acne generation, slow down allergic skin symptoms, so that the skin will be soft and smooth and get deep hydration.
5. Using magnetized water as shampoo in a long-term will strengthen hair root, prevent hair loss, reduce dandruff.
6. Magnetized water molecules are small so it will easily infiltrate and penetrate the human cells. So that the cells that carry the nutrients will be absorbed by the human body much easier, and it will take away the waste with ease, effectively promote the body's metabolism, improve the body's immunity.

Introduction to Magnetization Stirring Cup

Magnetization cup is a kind of hydro-magnetization device, which forms magnetized water after putting natural water into the magnetized cup. In China, magnetized water health treatment has a long history as early as 1400 years ago, during the North and South Dynasties (420 to 589 A.D.) the medical expert Tao Hongjing (452-536) in the "Mingyibieli" recorded that drinking magnetized water can prevent disease and help to "heal the kidneys, build strong ribs, lift the spirit and eliminate troubles, free the joint." A large number of studies in modern bio-magnetization and magnetic medicine have confirmed that magnetized water (magnetized wine) has good magnetic effects.

How to use the magnetization cup

I. Material Introduction

This product is made of high-quality stainless steel.

II. Power Support

This product has a battery function, directly press the button to start

III. Method of Application

Put natural water in the cup and switch on—accelerate the magnetization of natural water—add drinks—automatically stirring.

IV. Storage

clean the cup both inside and outside—keep dry—store at room temperature

V. Attention

1. This product is strictly prohibited close to the source of fire, please use or store away from high temperature.
2. This product is strictly prohibited from the whole immersion cleaning, so as not to destroy the circuit leading to the loss of function.
3. When inserting battery, please note positive and negative polarity, mixed use of new and old batteries is strictly prohibited.
4. This product is not suitable for refrigeration, not suitable for dishwasher cleaning, not suitable for microwave.
5. Please follow the above matters and instructions for use to avoid improper use and cause damage to the product or other loss.
6. The battery contains hazardous substances, and the battery must be removed from the appliance before discarding; When removing the battery, the appliance must be powered off; Batteries should be disposed of safely
7. Waste batteries are handed over to professional institutions that can recycle rechargeable batteries for disposal

How the magnetization cup works

The magnetization cup is equipped with a magnetic device, motor, magnetic rod and power control switch. The magnetic device of the magnetization cup is hidden on the motor drive shaft at the bottom of the cup, the magnetic rod is installed on the bottom surface of the cup so that it would contact with liquid, and the magnetic rod and the magnetic device built into the cup generate a magnetic field. When plain water is added into the cup, open the power control switch to power the motor that built into the cup, the magnetic device drives the magnetic rod to stir the liquid in the cup at high speed, thus effectively accelerates the flow of liquid in the cup in the magnetic field. Under the magnetic field, the physical and chemical properties of the water change and become a magnetized water with biological effects.

Magnetization cup structure and magnetization method

When natural water in the magnetization cup flowing through the magnetic field (or staying in the magnetic field), the vertical cutting line of water (or the cutting magnetic line caused by the thermal motion of water) produces electromagnetic induction. Under the magnetic field, the physical and chemical properties of water change and become magnetized water with biological effects. The magnetization process of water will gradually change the arrangement of water molecules, destroy the hydrogen bonds between the water molecules, so that the water molecules become single-dispersion molecules, long bonds turn into short bonds, as a result increasing its penetration and dissolution capacity, and makes it easier to penetrate the stones as well as the body's internal organ laver and parietal laver. In addition, magnetized water can activate

6. Steps to remove the battery

1. Make sure the machine is turned off before taking it out
 2. Use a skid to open the shell along the gap in the fuselage
 3. Take out the motherboard fixing, take out the battery, and recycle the battery
- Take care to avoid short-circuiting the positive and negative terminals of the removed battery
Tape the terminals to insulate them

Product Name: automatic coffee mixing cup Capacity: 380ml

Model: SA-01 Power: 0.6W

Material: ABS, 304 stainless steel Standard: GB4706.1-2005

Rated voltage: 5V ==

Note: This product is suitable for adult use. There is a stirrer inside the mixing cup. Children need adult guidance to avoid swallowing and causing Damage.
