ASSA ABLOY

Latch Extension Assembly For 3-3/4" and 5" Backsets

10 Line and 10X Line Bored Locks

For proper installation, it is very important to assemble the latch extension on the latch in the position shown.

1. Insert yoke assembly into extension housing so that the yoke fork "A" faces the seam and cutaway "B" as shown. This orientation is critical for proper operation. This completes the extension assembly.
2. Assemble extension assembly to latch. Ensure extension ears "C" engage with latch ears "D", and simultaneously the yoke fork "A" engages latch tail "E".

3. After assembly, the seam and cutaway "B" need to be in the same side as deadlocking guardbolt. Then assemble sleeve to hold both latch and latch extension.

4. Test the deadlocking of the latch: Press and hold guardbolt. Latchbolt must block, if pressed. Test the retraction of the latch by pressing the latchbolt and pulling on tailpiece "F".
