

LiftOperator® Intelligent Control

A standard feature with all S.R.Smith pool lifts, the LiftOperator® is the most technologically advanced pool lift control on the market.

- Emergency stop button stops the lift mid-cycle
- Audible safety alert can signal facility personnel
- Internal memory stores usage data that can be uploaded for analysis
- PAL, PAL2, aXs and Splash! series feature four directional control
- multiLift and ML300 feature a two-button, up and down control

A pool or spa deck profile sheet must be included with every S.R.Smith pool lift order—www.srsmith.com/LiftProfile

accessibility
equipment

MOBILE AQUATIC CHAIR (MAC)

The MAC, with a 300 lb/136 kg weight capacity, is essential for facilities utilizing a ramp for zero-depth entry or movable floors.

HANDY LIFT

This manual hydraulic lift, made from stainless steel, is for residential use only and does not meet ADA guidelines.

- 400 lb/181.5 kg lifting capacity
- Easily removable from deck anchor
- Manual operation by someone other than user
- Heavy-duty mesh sling for easy transfer
