ABOUT TRUPRO™ STAINLESS STEEL

Zakarian by Dash TruPro™ Stainless Steel Cookware has a unique nonstick coating that is not like other stainless steel products. Follow these tips to ensure the longevity of your product:

Aerosol cooking spray should not be used on nonstick stainless steel as it damages the coating and is difficult to remove.

Cooking over a high heat burner for prolonged periods may cause staining.

Silicone handles may get hot while your cookware is in use: use care when moving from your stove or heat source.

PROPER USAGE

Use low to medium heat

Your stainless steel cookware will retain heat very well, and will come to temperature quickly. The heat will be evenly distributed so high heat is not necessary for preheating. We recommend to preheat on a medium heat.

Preheat with oil, butter or water

Use a small amount of oil or butter to lightly and evenly coat the inside surface each time you cook. Do not use aerosol cooking sprays. Allow the oil or butter to heat for a minute before adding food. Never heat your cookware empty or dry as this can result in property damage or injury.

Nonstick safe utensils recommended

Silicone, nylon or wood utensils are recommended to protect the nonstick coating.

Allow to cool

Always allow the cookware to cool before submerging into water or other liquids. Never put a hot pan on a cold surface such as a marble countertop. Use a trivet.

GENERAL CLEANING

Your stainless steel cookware is dishwasher-safe, but hand washing is recommended. High temperatures in the dishwasher may discolor the stainless steel.

Hand-washing with a soft towel or sponge in warm, soapy water is recommended to prolong the cookware's original appearance.

Always allow the cookware to cool before cleaning. Filling with cold water before cooling may damage the cookware.

Never use steel wool or abrasive cleaning pads, as these may scrape off the coating. Do not use harsh cleaners.

CLEANING TOUGH STAINS AND BUILDUP

SOAKING

For tough stains, mix ½ cup of dishwasher detergent with 2 cups of hot water. Let stand in the cookware for 1-3 hours, then rinse and wash thoroughly.

SOLUTION

For some foods, simmering ½ cup of vinegar and scrubbing with a non-abrasive sponge will give better cleaning results. Do not use metal sponges or brushes.

DISCOLORATION

To help clean any discoloration or oil buildup, clean with Bar Keepers Friend® using a soft towel or sponge.
