

USER MANUAL

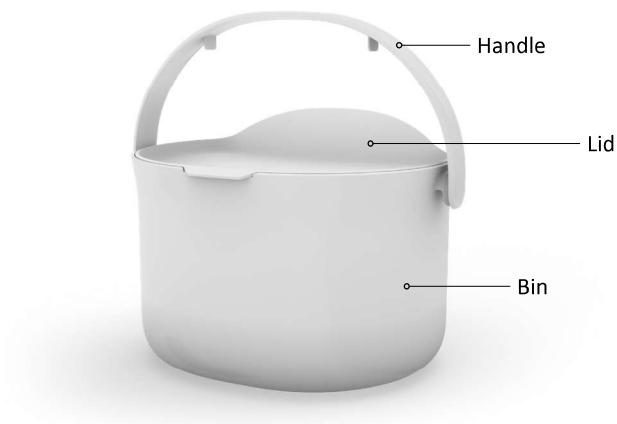

ORGANKO

DAILY

Your perfect bin for responsible and sustainable bio-waste management.

PARTS

DIMENSIONS

HELLO, DEAR USER OF THE ORGANKO DAILY BIO-WASTE BIN!

Thank you for your trust and for buying the Organko Daily bin. The bin will help you with your daily routine of collecting food waste. Its convenience enables you to effectively separate biological waste right on your kitchen counter. The recommended emptying interval is 1-2 days to prevent unpleasant smell and attracting flies. This applies in particular to those who will use the container as an aid in composting.

After a few days, the biological waste begins to rot and it is no longer suitable for composting, so it is important to ensure regular emptying and cleaning.

If you need more information, you can reach us on our website www.skaza.com/contact-us or on the telephone number [+386 3 896 36 00](tel:+38638963600).

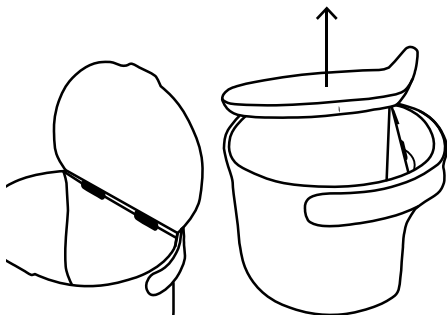

Your Organko Daily team

EASY CLEANING – ALL PARTS DISHWASHER-SAFE

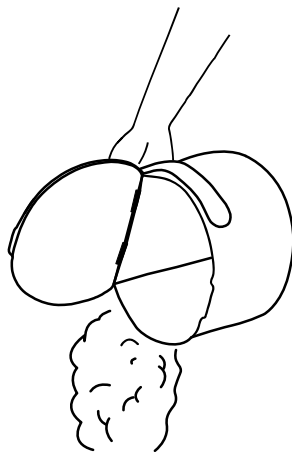

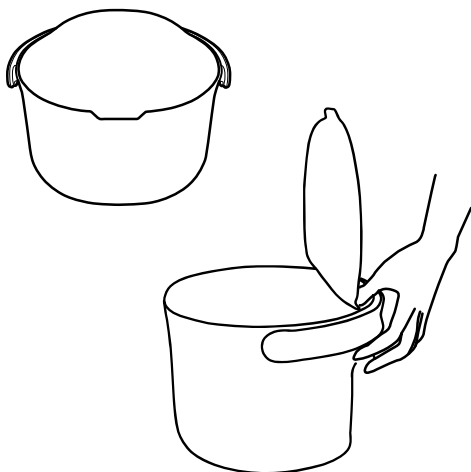

Disassemble the product before washing it in the dishwasher. Follow the icons below which describe the individual steps.

*Do not disassemble the handle.
Suitable for dishwashing at a max. temperature of 55°C or in eco mode.

SIMPLE ONE-HAND EMPTYING

MADE FROM POST-CONSUMER RECYCLED PLASTIC

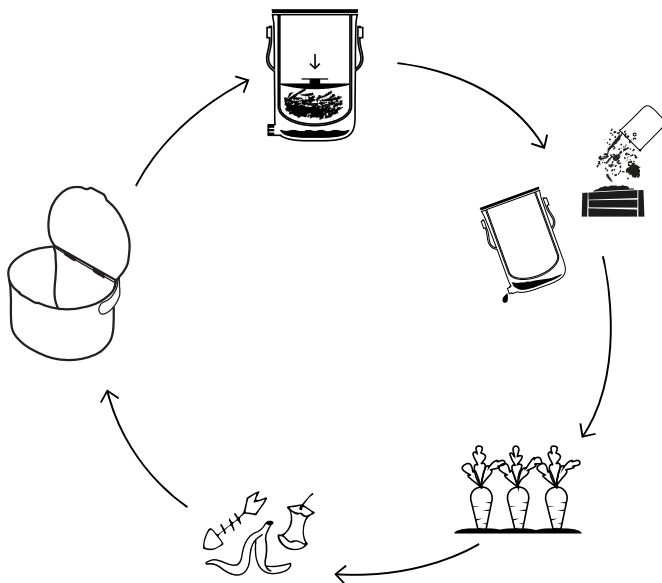

Post-consumer plastic is a material that has already stopped being used by the consumer. In other words, it is recycled plastic, made of discarded products, which are collected in dedicated containers for packaging or plastic.

BOKASHI ORGANKO CIRCULAR STORY OF BIO-WASTE

The next step towards responsible food management is reusing it with the help of fermentation with effective microorganisms according to the Bokashi method.

Fill your Organko Daily bin daily and empty it every day into a Bokashi Organko composter, where food material will no longer be a waste but a new source of life.
